

- EMTY Kubas**
UAB „Erudito“ Iloėjus, Lithuania
We want to make healthier sweets which would be liked by people.There is no added sugar in the ice cream, ev-erything is made from fruit, and we use honey for sweet-ness.
- Pinokis**
Kauno technologijų mokymo centras, Lithuania
Pinokis manufactures and sells wooden toys. Since raw materials cost almost nothing (wood or other types of waste remaining in workshops after vocational training of carpenters and joiners are used to manufacture products) the low cost of Pinokis products is maintained. They can be sold at lower prices than competitors. Our core values: 1) ecology (wood waste is used for products (save the tree), 2) sustainability (give the item a second life), 3) inclusive education (Pinokis is supplied with some products by students with special needs).
- Teni**
Vytauto Didžiojo universiteto „Rasos“ gimnazija, Lithuania
Teni is made from secondary, non-recyclable tennis balls that biodegrade in 400 years and are discarded by the millions each year. Scientists have proven that taking a walk barefoot on a rugged surface is beneficial for your health. Walking barefoot outside is an option however, the risk of stepping on glass or other sharp objects is extremely high. Our product both: creates a safe environ-ment for walking barefoot while improving health and significantly lowering global pollution.

- Prąblyntis Džiaugsmas**
Kauno Versvų gimnazija, Lithuania
There are many organizations in the world that invite do-nations to solve various problems, but often the organi-zations do not give anything to the person who made the donation. On average, about 80 children are diagnosed with oncological diseases in Lithuania every year, and their treatment is difficult and expensive. To help these children, we create Morse code bracelets, the profits of which we donate to children suffering from oncologi-cal diseases through the Rimantas Kaukenas Charitable Foundation. A customer who buys a bracelet, on which a personalized wish can be encoded in Morse code, not only has the opportunity to surprise a loved one, but at the same time contributes to the treatment of children with cancer. In the future, we plan to include children with these diseases in the bracelet production process, thereby contributing to their ways of self-expression.

- Pagalba GO**
Kauno Jono ir Petro Vileišių mokykla, Lithuania
Our team created a medical aid app for Lithuanian peo-ple who want to get information about how to safely and quickly heal minor injuries. Minor injuries like getting a bruise are not something we immediately visit the doctor for – we take care of such small medical issues by our-selves. However, in some cases we may lack experience and turn to the Internet for help, but with so much data on it we can quickly become overwhelmed. PagalbaGO is a simple app that provides information on how to treat such minor injuries, all laid out in a concise, easily under-standable and user-friendly manner. Take it wherever you go and rest assured you have a buddy on your phone to help you out whenever you need a medical advice. Cur-rently there are no apps in Lithuanian that provide trusted and doctor-approved information on minor injuries and how to treat them at home.

- FotoYgrikas**
Kauno Maironio universitetinė gimnazija, Lithuania
Nowadays, people are using a lot of social media, and sharing lots of content, and not everyone has the equip-ment or knowledge to take and edit photos and videos. Our aim is to offer these people our filming, photography, photoshop, video editing, pictures selling services at a competitive price.

- Tenebris**
Kauno Maironio universitetinė gimnazija, Lithuania
The problem is a reduced teenagers communication in reality and the formation of preconceived opinions. We organize events for students of a school in order to get to know each other, but they are blindfolded for the duration of the conversation so that they are more con-fident in communicating and not thinking about their appearance. After the conversation they take off the eye masks and see who they were talking to. It encourages real communication among teenagers, and they are also encouraged by the fact that they cannot see each other. This is a new form of real communication that has not yet been tested in Lithuania and can really pay off when trying to bring the school community closer together.

16–19

- RoomMates**
Kauno „Saulės“ gimnazija, Lithuania
RoomMates is an app that will help young people to find a roommate and a place to live in. This idea takes an inno-vative approach to solve an old problem which is: rising municipal taxes and rent price that makes it vay harder for students to afford rent. The world is changing, so the solutions must change together. RoomMates allows you to find a roommate with similar interests in a safe online environment and gives an opportunity to find housing on the same plane by determining the desired housing price, housing nature, city, and district.

- Diamond Glow**
Kauno Kazio Griniaus progimnazija, Lithuania
We've found a solution to help people wear reflectors as an accessory. We wear reflectors not for beauty, but also for safety. We assure you that with these reflectors you will not only be safe on the road, but also shine from afar. They protect human life and help to be visible on the road. You can wear them during the day, as they look gor-geous.

- Tinginiai**
Kauno „Vyturio“ gimnazija, Lithuania
Unique and fun alternative to outdated desserts that you can enjoy with coffee. High quality and compact pack-aging from ECO friendly materials.We are bringing back a beloved Lithuanian dessert in a modern and accessible way.

- ALZA**
Vilniaus Aleksandro Puškino gimnazija, Lithuania
We suggest vegan handmade soap with design.The problem is that not everyone washes their hands when they should, and diseases spread as a result of not wash-ing your hands properly. Our product – soap, is the per-fect solution to this problem.ALZA is eco-friendly, orga-nic and 100% vegan product, it softens the skin with oils and kills germs.

- Kombo Market**
Vilniaus Jono Basanavičiaus gimnazija, Lithuania
Our user-friendly mobile application offers a platform for individuals to sell their leftover unmarket food products, while enabling small farmers to monetize their naturally grown food products. This results in a significant reduc-tion in food waste and is designed with a simple and intuitive user interface to enhance the customer experi-ence. Through our platform, customers can purchase affordably priced, naturally grown food directly from local small-scale farmers, providing a cost-effective and sus-tainable solution to their food needs.

- Persoli**
Jonavos Jeronimo Rallo gimnazija, Lithuania
Persoli is a handmade solid perfume for the body in unique, environmentally friendly packaging. It is char-acterized by a variety of scents, including natural ones, suitable for people who are irritated by sharp smells. Perfect for traveling people due to its durability. We also use natural products to make them, so it can be a cute symbolic gift for a loved one. Handmade newspaper bags are used for all product packaging. We try to pollute the environment as little as possible.

- Plantum**
Private English Language School "Prof. Ivan Apos-tolov", Bulgaria
"Plantum" is a student company that deals with the development, production and sale of our original organ-ic soil substitute. Our blend is completely natural and chemical-free. It has many beneficial properties that make the plants healthier and better-looking, all the while being easier to look after!

- TEA&GO**
Chernivtsi Professional Lyceum of Services, Ukraine
This is a company that sells tea which are in paper cups. A paper cup has got two-layer in which an automated measure of tea is poured, it is sealed by a membrane with a paper filter which people use in the manufacture of tea bags, by the method of thermal soldering. A cup is sturdy, it doesn't leak. Also it doesn't burn our hands, it doesn't get wet. There are three types of tea in the assortment: lippy fruit, green soursop and black tea.

- FUT BRAIN**
Kauno „Santaros“ gimnazija, Ukraine (UPLIFT project in partnership with UNICEF)
Depending on which region you live in and in what cli-matic conditions you are, people have different frost resistance. Now we are in Lithuania, where the climate is not familiar to Ukrainians, because in Lithuania there is high humidity and cold wind. We are not very used to such kind of weather, so we came to the general decision to create warming gloves.

- GoGo**
Novoelzjo „Minties“ gimnazija, Ukraine (UPLIFT proj-ect in partnership with UNICEF)
Mobile app, helping to motivate people move more. It contains some healthy tips, notifications, inspiration. We also help people to understand bad consequences of lifestyle with not enough moving. The app is addressed to young people, teenagers in particular, who don't think about the consequences of their lifestyle.

- Fancy Belt**
Higher Vocational School 3, Chernivtsi, Ukraine
We give new life to old things, thereby saving our planet from fabric waste. And with this, we create accessories that complement any style, color and desire.

- Braided Beaded**
Kauno „Santaros“ gimnazija, Ukraine (UPLIFT project in partnership with UNICEF)
Our student company identifies a problem that there are very few jewelry in stores that you can buy for a reasonable price.For this reason our team makes affordable and beau-tiful jewelry that people can wear every day.

- HydroScrub**
Kauno Versvų gimnazija, Lithuania
The problem that HydroScrub solves is that there is an unpleasant smell and sediment in the water bottles due to various liquids and excessive consumption. For this reason, people avoid drinking from water bottles and usually throw them away, which affects the nature. So, we decided to make water bottle cleaning tablets to minimize the problem. Our product is eco-friendly, handmade with ingredients, that don't affect people's health.

- CardJoy**
Kauno Versvų gimnazija, Lithuania
The problem is that teenagers cannot find common topics to talk about with a partner they like. So we created cards to solve this problem. The advantages of our product are that we focus specifically on teenagers.
- DER**
Kauno Versvų gimnazija, Lithuania
Our product is candles made out of pearl wax that we im-ported from America, because there are no alternatives for it in Europe. The wax is made out of palm trees, witch is less toxic for humans. Our candles are also superior from regular candles because of their consistency, and if they get knocked over its very easy to simply put the wax back inside the candle.

- EnglNears**
Kauno Jono Basanavičiaus gimnazija, Lithuania
Our aim is to help our users which can't easily wake up in the morning by creating an innovative app. Our solution works by eliminating the possibility of turning a clock alarm off without fully waking up. The app works with a small NFC tag which we sell.

20–37

- Kirpčiukai**
Vytauto Didžiojo universiteto „Rasos“ gimnazija, Lithuania
Do you ever cut your hair and the client's hair always falls on the ground? Well, we got a solution. You should try the "Hair Catcher". It is a tool, used for keeping your place clean and tidy. It is innovative and highest quality product, which takes very little space but provides the hairdress-er opportunity to not deal with all the useless hair.This product has not been seen anywhere else around and hairdressers are not using it yet. This has the potential to be used by all hairdressers for its huge convenience and comfort.

- GK Always First Studio**
Kauno Kovo 11-osios gimnazija, Lithuania
We suggest street dance lessons for school kids. The problem of low physical activity is solved. Learning to work in a team, to participate in competitions and com-pete.

- Prezidento Valdo Adamkaus gimnazija, Lithuania**
We sell tote bags that are made out of "useless" textile that end up thrown out into land fills. We reuse unwant-ed textile from businesses and non used scarves to give them a new life as a tote bag. It not only helps business-es reduce thrown out textile but also helps us reuse them in better ways.

- SUSTISUK**
Kauno Versvų gimnazija, Lithuania
Creative kit roll a wax candle by yourself! – It is time for communication! Hand craft therapy with family & friends. All what you'll need are in the kit, so enjoy the process and community. We offer a kit with a natural bees wax (extracted locally in Lithuania).

- ZERO EAT**
Vilniaus Simono Daukanto gimnazija, Lithuania
Mobile application ZERO EAT emphasizes the problem of food waste. We give consumers the opportunity to purchase surplus food products at a lower price, and the institution itself partially covers its costs.

- BIO MERRAA**
Panevėžio „Saulėtekio“ progimnazija, Lithuania
Spinoco is a key chain spmlmer that is made out of very durable plastic and a metal bearing that is made out of steel, which lets you spin your keys with ease. During that process it helps you to release anxiety and all the stress that you have built up during a hard or a tough day.Some days at school can get stressful, filled with loads of anx-iety and all you want to do is relax. We thought of an idea while we were spinning keys on a little metal circle, but it wasn't comfortable enough, so we created a design that is comfortable, made out of durable plastic and a high quality steel bearing which lets you spin your keys or an that fits.

- SPINCO**
Kauno Stepono Dariaus ir Stasio Gireno gimnazija, Lithuania
Spinoco is a key chain spmlmer that is made out of very durable plastic and a metal bearing that is made out of steel, which lets you spin your keys with ease. - Luanda**
Kauno Maironio universitetinė gimnazija, Lithuania
Our dry shampoo is handmade and completely natural. It is made using only five ingredients. The main goal of our company is continuity and making your hair look the best it can.Our dry shampoo doesn't use any synthetic materi-als meaning it's completely natural and doesn't harm the environment.

- The Power Of Smells**
Kauno Versvų gimnazija, Lithuania
Our candles are made from natural soy wax, which is free of paraffin and other substances harmful to health and the environment, as well as natural, vegan, fragrance oils that have not been tested on animals. The scents are great and safe alternative for those who don't like to burn candles.

- GABKO**
Vilniaus Abraomo Kulviečio klasikinė gimnazija, Lithu-ania
Our product is a communicative card game that encourag-es more open, meaningful conversations between people. The game helps individuals take a closer look at them-selves, the people around them, their feelings and their emotions. The product addresses the lack of lively, open communication in modern society. Our goal is to inspire people not to hide their feelings and be honest with each other through the power of truthful, sincere conversation. The game does not have strict rules, the player has to draw a card, ask the written question and dive into the depths of conversations.

- HydroScrub**
Kauno Versvų gimnazija, Lithuania
The problem that HydroScrub solves is that there is an unpleasant smell and sediment in the water bottles due to various liquids and excessive consumption. - APM**
Vilniaus Aleksandro Puškino gimnazija, Lithuania
Our products are handmade accessories for pets, such as leashes, collars, hats. The leashes and collars come in different sizes and colors and are secure and durable. The hats with different sizes and designs are made for pets to wear for a photoshoot or just for their and their owners' pleasure. We create these products from high-quality materials with our own hands and send part of the mon-ey we make by selling products to pet shelters. Using our products the pet owner can be sure that during their walks a pet will be comfortable, happy and secured.

- Liauxeta, Spain**
Sleepitle
Kauno Valdorfo mokykla, Lithuania
Imagine you have stopped for a few hours in a city you don't know, or you just have a few free hours you want to spend in a productive way (not swapping the phone screen) and can't think of anything to do. That's where the DE Cloud app comes in! In the DE Cloud app, you can set your current location, your hobbies, and an available time.In the app, there is data about the places and insti-tutions available to visit. So the app analyzes your prefer-ences and suggests you an activity route. It's easy! You can also tag more of your interests in our app, which will be taken when selecting activities personally just for you. Our app is designed for short-term tourists or people looking for a quick solution to spend a few hours of their free time. According to user preferences, the app sug-gests a personal and unique route to spend the time

- HAPPY PET (HP)**
Kauno Kazio Griniaus progimnazija, Lithuania
The educational toy is made from nature-friendly mater-ial (our clothes that are not worn). In this way, we do not want to give our pets plastic, which shrugs, crumbles when the pet bites, thereby polluting the environment. We recycle clothes and at the same time resurrect them for a second life.

- Lions eco-notebooks**
Lviv Professional College of Hotel, Tourism and Restaurant Service, Ukraine
Our company "Lions eco-notebooks" offers production of Eco-notebooks with your favorite aroma. Our Eco-note-books are an exclusive product with a cover made of eco-cardboard obtained from recycled raw materials and with the addition of confectionery flavoring. We fought to create a product that would not harm the ex-hausted nature. "Not to make millions, but to think about future generations".

- ECOWORD**
Kauno „Santaros“ gimnazija, Ukraine (UPLIFT proj-ect in partnership with UNICEF)
People have global problem, when spots remain on the surfaces after hot dishes. We suggest a tray for hot dish-es
- DE Cloud**
Kauno Valdorfo mokykla, Lithuania

- DropshipLietuva**
Vilniaus Gedimino technikos universiteto inžinerijos Iloėjus, Lithuania
Our team's solution is to sell stress-relieving rings. Unique de-sign rings are made of durable materials that will ensure cus-tomer satisfaction with our product. The principle of operation is very simple, therefore it ensures longevity. The ring consists of two metal parts. One part of the part never rotates and stays in place on the finger, and the other part can be rotated , thus reducing stress. It is especially helpful for people who suffer from an anxiety disorder called obsessive-compulsive disorder (ODD).

- Calendarium**
Lietuvos sveikatos mokslų universiteto gimnazija, Lithuania
Our mobile app is a calendar for the community of a spe-cific place. "Calendarium" is an app where you can quickly and easily find and submit information about upcoming events in one place for community members.

- Aristokratal**
Kauno Jono Basanavičiaus gimnazija, Lithuania
We're creating sports app, where you can choose a sport, that you might never heard of.

- Honeycomb**
Kauno Kovo 11-osios gimnazija, Lithuania
We educate children about bees, because according to our research, not many people know about them. We are talking about the big decline of bees, we are trying to attract as many people as possible to help stop it. During education together with students we make bee products like candles, honey toys of honeycomb. With this prod-ucts we show what cool things can be obtained from bees.This education is for our future generations. We think is time to start taking actions if we want in future to have bees, because they help a lot in nature and also to people.

- FlyNow**
Kauno „Saulės“ gimnazija, Lithuania
A website that makes vacation booking easy for all trav-ellers. It compares prices and offers of the most popular travel agencies. On this site, people can find travel tips and news so that vacations won't be stressful.Our ser-vice offers travelers to book vacations in a completely new and easy way that was never seen in Lithuania. This website helps people to take care of all their travel needs online so it would have less impact on our planet.

- ROSAE**
Kauno „Saulės“ gimnazija, Lithuania
We designed a coloring book for children aged 3 to 6 years, about the environmental protection, recycling and etc. We are trying to help improve the knowledge of young minds about our environment and how to protect it by creating a fun interactive coloring book. Within the book, there are a couple of QR codes that lead to educa-tional YouTube videos about recycling, compost and etc. The book includes QR codes, so that kids can learn and be productive even while using a mobile phone.

- Kervu**
Madona State Gymnasium, Latvia
Tea cubes with honey in a small metal box for easy travel and usage.Tea cubes – easier and faster way to make tea, honey – natural sweetener and there's no need for other sweeteners, metal box – replaces easy to destroy boxes and protects the tea from outside impacts and moisture, boxes compact size – easy and light to carry around.

- Goffeee**
Private English Language School "Prof. Ivan Apos-tolov", Bulgaria
Our business purpose is to make biodegradable coffee capsules that provide consumers with a sustainable and environmentally friendly alternative to traditional sin-gle-use coffee pods. The company aims to reduce the environmental impact of coffee consumption by offering biodegradable coffee capsules that can decompose nat-urally, without contributing to pollution or landfill waste. Through innovation in materials and production process-es we strive to create coffee capsules that are not only eco-friendly but also meet the high-quality standards of coffee lovers. By providing a sustainable and convenient coffee solution, we desire to attract environmentally con-scious consumers who are looking for ways to reduce their carbon footprint without sacrificing their love for coffee.In addition to our environmental mission, Goff-ee wants to build a strong brand that is associated with sustainability, innovation, and good quality coffee.

- SHOPPers**
Novolavorivske higher vocation school, Ukraine
We make shoppers out of used jeans, which is how we! Replace plastic bags2 Reuse jeans!We offer our cus-tomers to exchange their old jeans and get a discount in our store, where you can choose an eco-friendly denim shopper for every taste.Our company helps you to be stylish while protecting the environment.

- Vepro**
Vsĭ Gravitas Schola, Ukraine (UPLIFT project in part-nership with UNICEF)
Noticed a lack of an innovative platform that can lead volunteers to the next level?We suggest you a mobile app – Vepro, where volunteers and organizations can find each other and unite to improve humanity's future!We are calling out for actions, uniting people, helping them to gain new experiences, and building a better environment. Vepro – it's time to be useful!

- Gorilla Max**
Kauno „Vyturio“ gimnazija, Lithuania
Our company is solving a serious health issue in our society – declining physical activity. The value of our product is very clear as it increases physical activity and personal health. It also very portable, you can train with it in any location or space. Parallettes are used for safer callisthenics exercises. We are the first manufacturers of these products in Lithuania. We create parallettes with high-quality and ecological raw materials in collaboration with our local town partners – "Techranga". Sustainability and safety of our products are tested by professionals.

- EGP**
Prezidento Valdo Adamkaus gimnazija, Lithuania
We are a small group from President Valdas Adamkus gymnasium who want to implement our project in real life. Electricity Generating Panels which generates green electric power from the force that appears when walking on them.

- Sportren**
Kauno Versvų gimnazija, Lithuania
Exercise cards is a way to workout everyday. Everyday you pick seven cards, one for each color (muscle group). You start with the warm-up card and then you do the other six ones. Each card has three levels so you can choose which one is hard enough for you.Our solution is innovative because you can workout without distractions & mobile screens.

- MedKit**
Kauno Jono Basanavičiaus gimnazija, Lithuania
"MedKit" is a public first-aid kit. It would be accessible to everyone who has an accident. All supplies for different emergency cases will be put into a separate bags and you would know which bag to pick based on for a cer-tain emergency sign on it and a different color.

- TALK'TS**
Kauno „Saulės“ gimnazija, Lithuania
Our company noticed a big problem: most people now-adays have a difficult time starting conversations. So we created a card game with creative and interactive questions. These cards will help you spend less time on your phone, start conversations more easily, and get to know yourself and others better.Our card game differs from other games because the questions are written in two languages: Lithuanian and English. Since our brand is from Lithuania, this helps foreigners understand the questions and maybe even learn a new language. Our game will help people stay away from their phones and make conversations less awkward. We want to be sus-tainable, so our packaging isn't made with plastic. Also, our questions are unusual and creative, so some of them can bring a smile on your face.

- Cantare**
Kauno „Vyturio“ gimnazija, Lithuania
We present a musical card game, which you can play with your family and friends and have a wonderful time. Our game brings people together, as well as it teaches them new songs and introduces to new or old artists. Our game is unique and never before seen in Lithuania and Europe. Its main goal is to bring families together in a time were it's so easy to drift apart.

- The Soapwort**
Kauno Versvų gimnazija, Lithuania
The problem arose after seeing how people neglected hygiene after the abatement of COVID-19 and realizing that regular soaps were not nourishing our skin. We make liquid soap with saponaria. Saponaria is a plant that in ancient times was used as soap.Our liquid soap is free of skin-irritating sulfates and saponaria gives it a gentle lather. Our soap contains a lot of natural oils (avocado, almond) that nourish the skin, so you won't need hand cream after using the soap. We have two scents options.

- ESEVEM**
Alytaus Jotvingių gimnazija, Lithuania
When you push the button the outlet will turn off the se-lected electrical devices at your home or office. This will help you to protect your home from damage caused by fire or other unexpected events and avoid high electricity bills. So now you won't need to worry about your house safety.

- DVJ**
Jonavos Jeronimo Rallo gimnazija, Lithuania
We create designs on old and used clothes and turn them in to new ones, also we make eco friendly tote bags and paint them.

- Little Universe**
Madona State gymnasia, Latvia
Our Student Company makes glass piggy banks with tips for saving money. Money saving skill is important, because you can never know, when you'll need safety pil-low. That's why we draw people's attention to how they use/manage their money with our product.

- BeSweet**
State educational institution "Lviv Higher Vocational Polytechnic School", Ukraine
Our student company makes candies from natural ingre-dients: Dried fruits, nuts, sublimated berries and choco-late give them a sweet taste. We make our product with-out added sugar and harmful additives. These candies will help people take care of their health, using only nat-ural sweets.

- CTSM**
Kauno „Santaros“ gimnazija, Ukraine (UPLIFT project in partnership with UNICEF)
Our student company suggest clothes with various prints, which young people willingly wear. This is their distinctive style. The problem of youth style is solved – they want to be stylish, stand out from the rest.

- ReKuKle**
Ukrainian School "HEROIJAM SLAVA", Ukraine (UPLIFT project in partnership with UNICEF)
Our business has a social mission: we give a second life to wasted paper by making eco supplies. We plan to recycle used notebooks, quite a lot of which remain in the school. Our product is eco pens, eco pads, eco folders.

- Kauno Jono Basanavičiaus gimnazija, Lithuania**
"MedKit" is a public first-aid kit. It would be accessible to everyone who has an accident. All supplies for different emergency cases will be put into a separate bags and you would know which bag to pick based on for a cer-tain emergency sign on it and a different color.
